

Carmarthenshire County Council have used over £1.3m of Salix loan funding to implement lighting refurbishments and insulation measures across their estate. This is how they did it with Salix.

Project overview

Salix helped Carmarthenshire County Council to deliver lighting refurbishments and insulation measures across more than 90 schools, leisure centres and offices in the county. The results are annual financial savings in excess of £217,400 and CO₂ savings of over 1,200 tonnes a year.

The strong Salix business case

Treating the environment with respect is a core value Carmarthenshire County Council takes very seriously. As the largest employer, purchaser and provider of services in the county they have an obligation to set an example for others to follow. Carmarthenshire County Council is using Salix to;

1. Deliver a lighting upgrade programme across its whole estate
2. Insulate exposed heating pipework in its buildings
3. Invest in energy efficient IT solutions

Working with Salix

Why Salix?

The availability of 100% interest free funding coupled with friendly, helpful advice from an organisation that does all it can to see your projects succeed, gave Carmarthenshire County Council a cost and resource effective solution.

The Salix funding was ideal for supporting the programme of energy efficiency projects identified by the Property Services team.

The Salix solution

Carmarthenshire County Council used Salix funding to deliver lighting refurbishments across 62 schools, leisure centres and offices in the county. 28 insulation projects have also been completed. Their £1.3m capital finance loan will allow them to benefit from over £217,400 in annual energy cost savings and help them cut emissions by more than 1,200 tonnes a year.

How Salix worked

Salix worked with Carmarthenshire County Council to deliver a technically strong and financially solid business case that helped them deliver 62 different lighting projects. The business case illustrated that the savings generated will pay for the investment within 8 years.
